

COMPLEX CASE MANAGEMENT REFERRAL FORM

As a partner provider caring for GHC-SCW patients you may identify members who could benefit from Complex Case Management. With Complex Case Management (CCM), a RN or SW case manager performs an assessment, education, coordination of resources and ongoing communication with the provider to facilitate quality care and individual treatment plans.

Potential Case Management members must live in the state of Wisconsin and have GHC-SCW insurance as their primary payor. Members who have Medicare A&B as Primary Insurance do not qualify for GHC-SCW Case Management.

We are presently offering CCM for patients for the following diagnoses:

- Members with both diabetes and cardiovascular disease
- Members with Substance Abuse Disorder (Opioid and Non-Opioid)
- Members with a psychiatric admission (within the past two months) who also have a chronic disease diagnosis
- Members under the age of 18 with a recent psychiatric admission (within the past two months)
